EDUCATION

St. John's University | Queens, NY

May 2027

B.S. in Computer Science

Relevant Courses: Machine Learning, Data Structures, Algorithms, Files & Databases, Object-Oriented Programming, Software Design Method

TECHNICAL SKILLS

Operating Systems: Windows 10, Windows 11, MAC OS, Linux, Ubuntu

Applications: Microsoft Office 365, Adobe, Microsoft Teams, Google Workspace, VMware, VirtualBox

Languages: Python, Java, HTML, CSS, JavaScript, SQL, Git

Technologies: Docker, Flask, Git, Node.js, **PyTorch**, React.js, REST APIs, Tkinter, Pandas, Matplotlib, NLTK, SQLite

Tools: Jupyter, MySQL, TensorFlow, GitHub

Certification: IBM - Introduction to Artificial Intelligence (AI) (March 2026), IBM - Generative AI: Introduction and Applications (March 2026), IBM - Generative AI: Prompt Engineering Basics (April 2026), IBM - AI Foundations for Everyone (April 2026), Google - Technical Support Fundamentals (April 2026), Google - The Bits and Bytes of Computer Networking (April 2026), Google - Operating Systems and You: Becoming a Power User

Operating Systems and You: Becoming a Power User (April 2026), Google - System Administration and IT Infrastructure Services (April 2026), Google - IT Security: Defense against the digital dark arts (April 2026), Google - Accelerate Your Job Search with AI (April 2026), Google IT Support (April 2026), IBM - Exploratory Data Analysis for Machine Learning (April 2026), IBM - Supervised Machine Learning: Regression (April 2026), IBM - Unsupervised Machine Learning (April 2026), IBM - Deep Learning and Reinforcement Learning (April 2026), IBM - IBM Machine Learning (April 2026), BCG - GenAI Job Simulation (May 2025), Electronic Arts Software Engineering Virtual Program (May 2025), NeuralSeek Certification (June 2025), NeuralSeek Multi-Tier AI Agent Architecture (July 2025)

EXPERIENCE

St. John's University School of Law | Queens, NY

April 2026-present

IT Student Worker

- Diagnose and resolve hardware malfunction for multi-function printers and peripheral devices ensuring minimal downtime for faculty and students.
- Maintain and configure campus security and event cameras, providing technical oversight to ensure high-quality recording and surveillance.
- Manage a high volume of phone and email inquiries, translating complex technical issues into easy-to-understand solutions for non-technical users.
- Perform routine inspections and preventative maintenance on office technology to identify and fix issues before they disrupt school operations.

TechX | Remote

June 2025 - Aug 2025

Data Engineer Intern

- Designed intelligent applications using Python, NLP, and data visualization.
- Collaborated in Agile sprints using Git, performing code reviews and demo days.
- Research generative AI tools to enhance user experiences and automation.

- Created conversational agents using LLMs and prompt engineering.
- Improved agent context handling and response accuracy.
- Focused on ethical AI practices and iterative agent optimization.
- Create Agent AI using mAIstro.

PROJECTS

Personal Finance Tracker | Python (Flask, SQLite, Pandas, Matplotlib), Tkinter

May 2025-present

- Developed a full-stack finance tracker with CLI, GUI (Tkinter), and web interfaces (Flask), enabling users to log transactions, analyze spending, and manage budgets.
- Implemented SQLite database for transaction storage, with features like recurring payment detection, budget alerts, and net savings calculations.
- Integrated Pandas/Matplotlib for dynamic visualizations (spending trends, category breakdowns) and export/import functionality via CSV.

Chatbot Application | Python (Flask, Tkinter, NLTK)

April 2025-present

- Developed a multi-interface chatbot (CLI, GUI, and web) using NLP techniques (tokenization, sentiment analysis, named entity recognition) with NLTK
- Implemented context-aware responses, dynamic reply generation, and conversation history tracking with SQLite database
- Built three frontend interfaces: terminal-based, desktop GUI (Tkinter), and web app (Flask) with voice input/output capabilities
- Incorporated randomization for dynamic replies, creating a more conversational experience.
